

# Promat ducting solutions and innovations for 2023

Linas Kriščiūnas

**2022 November 29** 

## **Contacts in Baltics**

Linas Krisciunas – Promat project manager Lithuania, Latvia, Estonia

- 9 years of experience in Passive fire protection in Baltic countries.
- First in Europe to lead certification on smoke extraction ducts in 3-sided configuration in Lithuanian Fire Research centre according to European harmonised standard EN12101-7.
- Member of Latvian fire safety association.
- Member of technical committee TK22 "fire safety" in Lithuanian Standards Board (LST).
- M: +37061888458 / E: linas.Krisciunas@etexgroup.com / W: www.promat.com

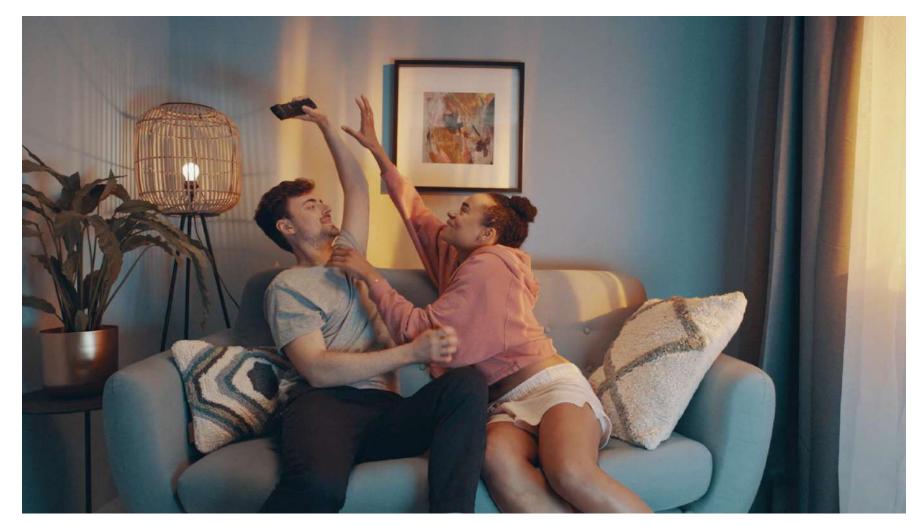

## Promat

# Promat – wide scope of possibilities

# 1. Promat wide range of smoke ducts

**Existing solutions:** EI60 / EI90 / EI120 (ho-ve) – S1500 multi (vertical and horizontal).

30 mm P-L500 for EI60 (3-4 sided) / <u>certified EN12101-7</u>

35 mm P-LS for EI90 (4 sided) / certified EN12101-7

50 mm P-L500 for EI120 (3-4 sided) / 3-sided and vertical with 40mm of P-L500 / <u>certified EN12101-7</u>

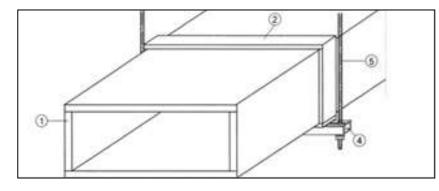

60 (2x30) mm P-L500 for EI180 as shaft (4 sided)

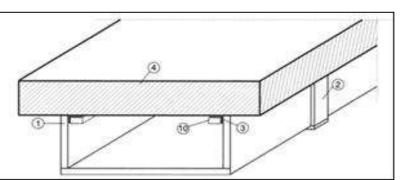

# 2.Advantages and benefits for 3-sided ducts

#### 4 sides

#### Feature Direct fixing to the

concrete slab (wall/ceiling)

#### Advantages

- Saving space
- Less materials
- Faster installation

#### Benefit

- Effective space usage
- Saving cost
- More efficient work and faster project realization

The only producer in Europe who has certificates for 3-sided ducts according to EN12101-7

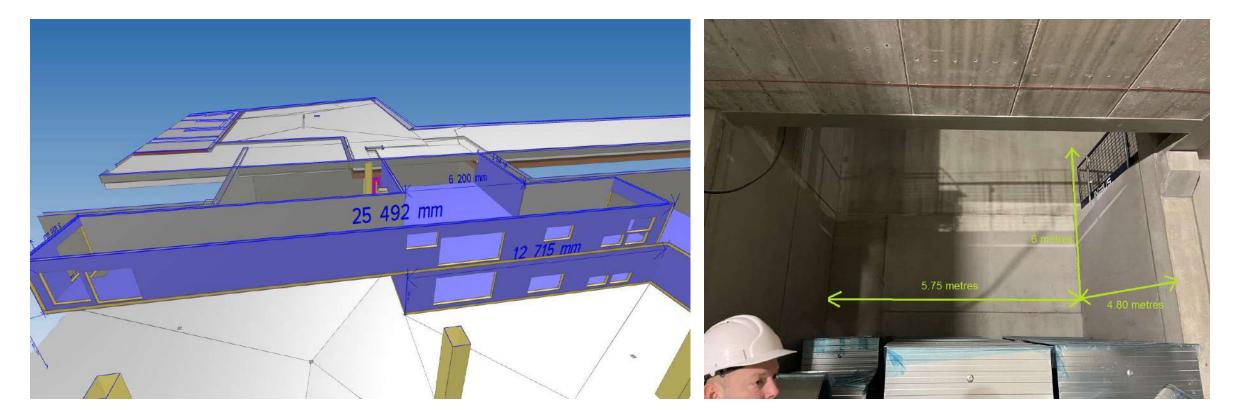

3 sides

# **3.Technical capabilities** (1<sup>st</sup> project case / designing)

- Type: office building in Vilnius, Lithuania
- Solution: Ventilation ducts EI180 with PROMATECT<sup>®</sup>
- Special features: a) enormous in size b) special construction will be done to support the duct

# **3.1 Technical capabilities** (1<sup>st</sup> project case / realization)

# **3.2 Technical capabilities** (2<sup>nd</sup> project / design and realization)

Type: apartment building in Palanga, Lithuania

**Solution:** horizontal **3-sided** ducting EI60 with PROMATECT<sup>®</sup>-L500

# **3.3 Technical capabilities** (3<sup>rd</sup> project / design and realization)

Type: office building in Vilnius, Lithuania

Solution: 4-sided smoke duct EI 60 with 30mm of PROMATECT<sup>®</sup>-L500

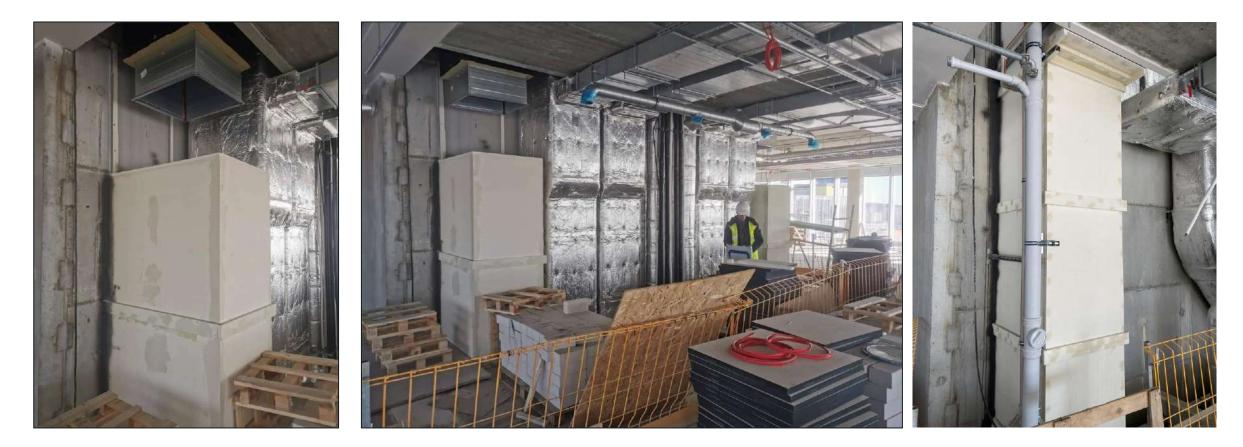

**3.4 Technical capabilities** (4<sup>th</sup> project / design and realization)

Type: office building in Vilnius

Solution: 3-sided vertical shaft/smoke duct EI 60 with 30mm of PROMATECT<sup>®</sup>-L500

# 4.Technical properties Promat vs Geostaf (pay attention!)

#### • Geostaf: gypsum based

Promat: calcium silicate

• Geostaf: EI60 30mm -22,5kg/1m2

• Promat: EI60 30mm -15kg/1m2

- Geostaf: 10 years
- Promat: 25 years

• Geostaf: only z2 category (internal use)

Promat

• Promat: z2 (internal use) and z1 category (internal use with high humidity)

**Humidity** 

# 5. Price comparison Promat vs Komfovent ducts EI60

## **6.Certificates**

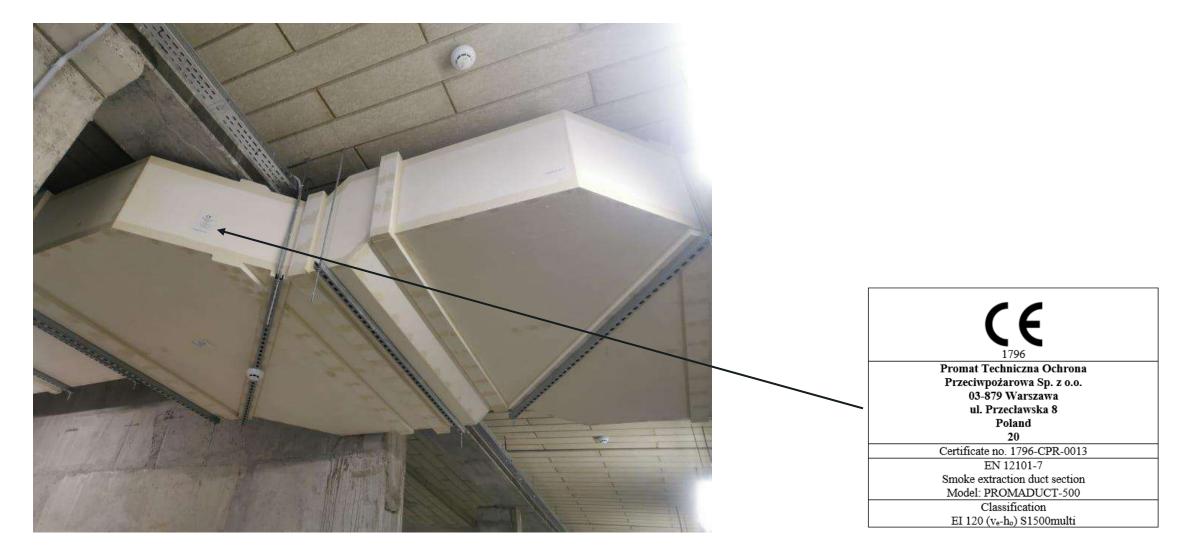

# 7. CE marking of duct sections

# 8. Promat in Projects

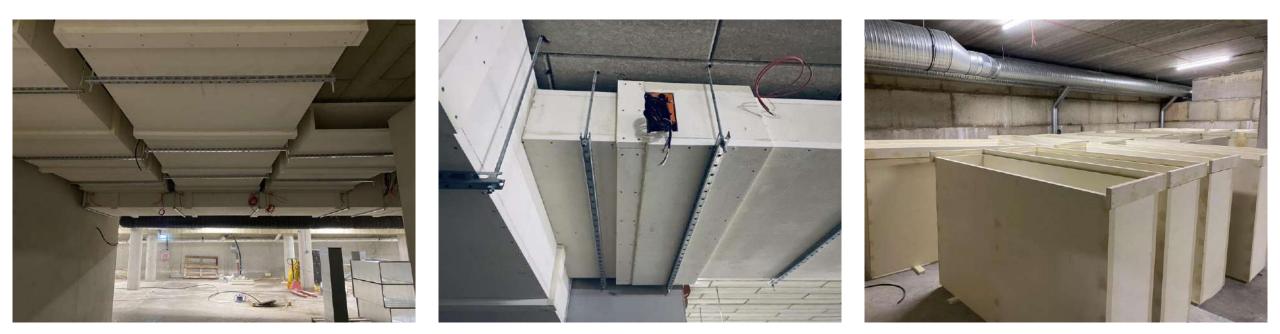

# 8.1 Promat in Projects

# **News and innovations!**

# 1.New solutions in 2023 (shaft)!

Solution: shaft EIS180

Description: P-L500 in 20mm + subconstruction + mineral wool + P-L500 in 20mm

#### New upcoming solutions:

40 mm P-LS+ for EI120 (4 sided / ho-ve) / <u>certified EN12101-7</u> 50 mm P-LS+ for EI180 (4 sided) / ho-ve) <u>certified EN12101-7</u>

# 3.Combined systems: ventilation & smoke extraction ductworks Promat

### What? Ventilation and smoke extraction system in one!

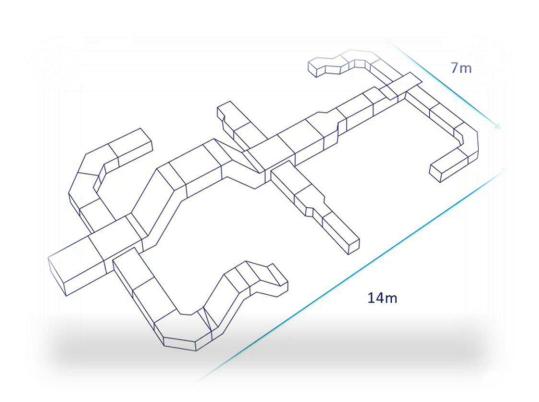

The **combination of air conditioning systems** (now present in almost all buildings, especially public ones) **and smoke extraction seems** to be the most effective solution, by saving:

Space

Energy

Money

# Promat

# Promat – wide scope of possibilities

Complete and unique

Combination of ventilation and smoke extraction ducts saves space

Very flexible solutions for good spatial adaptation

Special "tailored" construction solutions

Built-in components such as fire dampers, volumetric flow controllers, etc.

Horizontal and vertical configuration

Large cross sections

# **Good luck!**
