

BRASS HYDRANT VALVE 25

- they are used for drawing water from the water supply network at temperatures up to 40°C
- thanks to the use of a large pitch trapezoidal thread in the spindle, it is possible to quickly open and close the valve
- it is used as one of the components of an internal hydrant
- equipped with a STORZ system coupling
- in compliance with the EN 671

technical information:

Type	hydrant brass 25
Thread size	1"
Weight with coupling	0,36kg
Material	brass, aluminum castings, NBR seals
Working Pressure	16 bar (1,6 Mpa)
Flow diameter	18mm
